

**SLS AMG AND E-CLASS: THE LATEST M-B TECHNOLOGIES**

*by Richard Simonds, Technical Director*

**What:** Technical Presentation and Diagnostic Clinic  
**When:** Saturday, April 10, 2010, 10:00 a.m. – 4:00 p.m.  
**Where:** Mercedes-Benz of Walnut Creek  
**Cost:** \$17 per person (includes lunch)

Again, Mercedes-Benz is leading the world of luxury vehicles with technologies that enhance performance, improve safety, and reduce emissions. This technical session will explore what they are doing with their new flagship vehicles. Alan Moffat, Service Manager at Mercedes-Benz of Walnut Creek, with some of his professional staff will provide us with a grand insight into the technologies that make the new SLS AMG and E-Class vehicles so special.

We will start our morning with some fresh pots of coffee, treats, and fresh fruit at 9:30. At 10:00 Alan and his team will start the technical topics on the SLS AMG (Mercedes-Benz’s new “Gull Wing”) and the technologies that are available in the new 9<sup>th</sup> generation E-Class vehicles. These topics include Attention Assist, Adaptive High Beam Assist, Blind Spot Assist, Distronic Plus, Night View Assist Plus, and Stability and Control Technologies.

Around noon we will have a catered lunch with time to talk with the technical staff. After lunch, Alan Moffat has arranged for several of his top tier technicians to provide a diagnostic clinic. This includes a basic safety and technical inspection and an opportunity for you to bring in your vehicle with any questions you have about its operation, or perhaps a “gremlin” that has not yet been figured out. There is a space on the reservation form to indicate any special topics or questions you would like to have covered.

Depending upon the number of diagnostic sessions, we will conclude the afternoon somewhere between 2:00 and 4:00. The reservation deadline for this technical session is Friday, April 2 (see the reservation form on page 9). Questions, contact Richard Simonds at rsimonds@pacbell.net or (650) 592-7613.
